Day-1

Overview of Peripherals Theory

- Functions of printers , scanners , webcams ,and their connection interfaces.

Q 1 :- Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Ans-**Computer Peripherals – Printers, Scanners and Webcams**

1. Types of printers, scanners and webcams

The following information shows 3 types of printers, 2 types of scanners and 2 types of webcams with their real-life uses.

Device	Type	Real-life use
Printer	Inkjet printer	Printing college assignments and colour photos.
Printer	Laser printer	Printing many office documents quickly.
Printer	Dot Matrix printer	Printing bills and bank receipts.
Scanner	Flatbed scanner	Scanning photos and certificates.
Scanner	Handheld scanner	Scanning barcodes in shops.
Webcam	Built-in webcam	Attending online classes on a laptop.
Webcam	External USB webcam	Attending video meetings on a desktop computer.

1 - **Inkjet Printer**

-Prints colourful photos and documents using liquid ink.

2 - **Laser Printer**

-Prints documents quickly using toner powder.

3 - **Dot Matrix Printer**

-Prints using small pins and an ink ribbon.

Flatbed Scanner

-Scans photos, books and paper documents.

Handheld Scanner

-Scans barcodes on products.

Built-in Webcam

-Used for video calls and online classes.

External USB Webcam

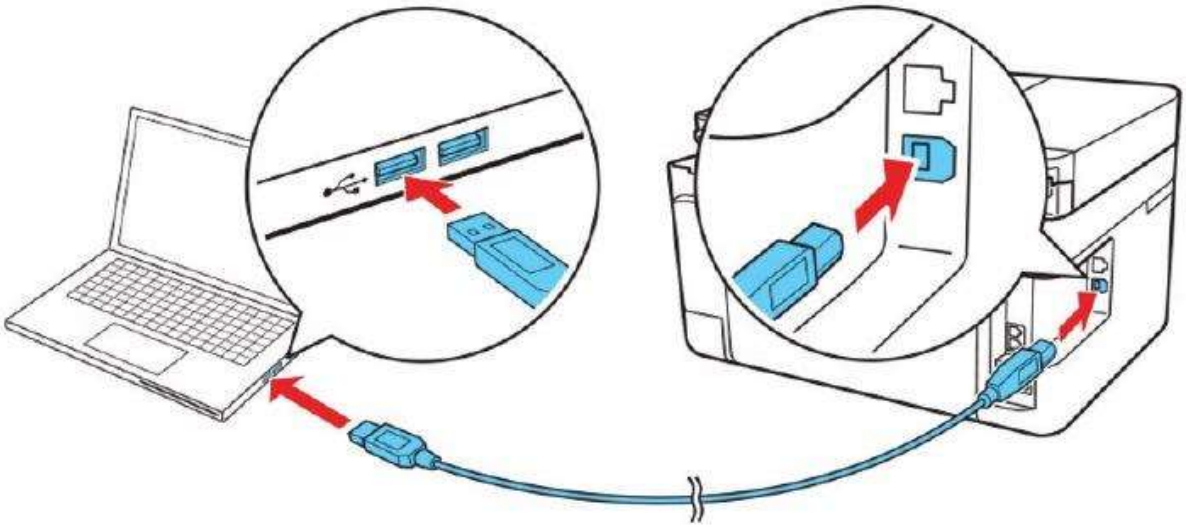

Used for video calls on desktop computers.

Q 2 :- Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

Ans- **Diagram: How a printer connects to a computer**

A printer can connect to a laptop or PC using USB, Wi-Fi or Bluetooth (if supported by the printer).

Laptop / PC

First Computer sends the document via

USB Cable / Wi-Fi / Bluetooth

Home Printer

Second step is Printer receives the document

3rd -print paper

Explanation:

1. Connect the printer to the computer.
2. Use a USB cable or connect both devices to the same Wi-Fi network.
3. Install the printer software if required.
4. Select the printer on the computer.
5. Click Print to print your document.

**Q 3 :- List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage.

Hint: Think about speed, convenience, and compatibility. Three connection interfaces and their advantages and disadvantages.**

Ans -Connection interfaces help devices communicate with computers.

Interface	**Advantage**	**Disadvantage**
USB	Fast and easy to connect.	Requires a cable.
Wi-Fi	Connects without wires and allows sharing.	Needs a Wi-Fi network and setup.
Bluetooth	Wireless and convenient for short distances.	Usually has a shorter range and slower speed than Wi-Fi.

Examples:

- USB – Connecting a webcam to a computer.
- Wi-Fi – Connecting a wireless printer.
- Bluetooth – Connecting a supported wireless peripheral.

Q 4 :- Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required. Steps to connect a printer to a computer.

Ans- Device selected: Home Printer

I would use a USB cable to connect my home printer to my laptop because it is simple and easy.

Step-by-step instructions:

1. **Switch on the printer:** Connect the printer to the power supply and turn it on.

2. **Connect the USB cable:** Take the USB cable and connect one end to the printer and the other end to the laptop.

3. **Install the printer driver:** Install the printer software using the installation CD or download it from the printer manufacturer's website.

4. **Open computer settings:** Go to Settings on your computer and open Printers & Scanners.

5. **Add the printer:** Click on Add Device and select your printer.

6. **Load paper:** Put paper into the printer tray and check that ink or toner is available.

7. **Print a test page:** Open a document, press Ctrl + P and select your printer.

8. **Click Print:** Your printer will print the document.

Result The printer is successfully connected to the computer and ready to use.

Conclusion

Printers, scanners and webcams are useful computer peripherals. Printers give us paper copies, scanners make digital copies and webcams help us communicate through video calls. USB, Wi-Fi and Bluetooth make it easy to connect these devices to computers.
